

Bachelor of pharmacy Course specifications

Name of Course	Credit Hour	Description
حقوق الإنسان	-الفرقة/ المستوى: الثانية / فصل أول -عدد الوحدات الدراسية : نظري (1) عملي (---)	التعريف بحقوق الإنسان في الشريعة الإسلامية ، وماهية حقوق الإنسان ومصادرها وحمايتها في القانون الدولي العام ، ودراسة أنواع الحقوق والحريات العامة والصليقة بالشخصية ، وحماية حقوق الإنسان في القانون الجنائي.
Mathematics	-Lecture: 4 hours per week -Practical: -- -Tutorial : -- -Total: 4 hours per week	-The current course aims at providing the students with the basic knowledge in algebra, analytical geometry, probability, statistics & calculus.
Pharmaceutical analytical chemistry	-Lecture: 2 hours/week -Practical: 4 hours/week -Tutorial: -- -Total: 6 hours/week	-The course aims to provide the student with basic knowledge in general and pharmaceutical qualitative analytical chemistry. The course also focus on understanding the theory and strategies used when developing separation methods for chemical analysis. Fundamentals and principles of the spectroscopic techniques (UV-visible, infrared) applied for pharmacopeial identification of pharmaceutical compounds are also covered in the course.
Pharmaceutical analytical chemistry	-Lecture : 3h/week -Practical: 4h/week -Tutorial : -Total: 7h /week	The course aims: -To provide students with theoretical knowledge of quantitative analytical methods. -To familiarize the students with practical skills and techniques required to design experiment, implement analysis using the relevant chemical literature, process and analyze the data and, effectively, communicate results orally and in writing -To cultivate a professional attitude and develop skills relative to communication, team work, time management and responsibility for individual learning
