EXPERIENCE AND RESEARCH INTEREST

I have practical experience in extraction, isolation, and identification of natural products of plant origin. I have experience in HPLC methods development and I worked as a principal investigator for a Bioequivalence Studies Division in Gulf Pharmaceutical Industries, (Julphar), RAK, UAE. Also, I have practical experience in isolation and assay of animal natural killer cells and peritoneal macrophages, and preparation, isolation, and selection of monoclonal antibodies. I have involved in research dealing with the spontaneous metastases of murine tumors, and the effect of nutrition and chemotherapy on treatment of primary and metastatic melanoma.
